

PERSONAL RELOCATION BUDGET PLANNER

Fill in the yellow fields, then transfer your figures to the Excel calculator for automatic totals.

YOUR RELOCATION PLAN

Destination country

Local currency

Exchange rate (local per USD)

Months until move

Emergency reserve months

Contingency percentage

QUICK SAVINGS SNAPSHOT

Estimated monthly living costs

USD \$

Total one-time move costs

USD \$

Emergency reserve

USD \$

Contingency allowance

USD \$

Recommended pre-move savings

USD \$

Planning note

Use conservative estimates. Verify current visa, insurance, tax, travel and exchange-rate costs before making financial commitments. This worksheet is for general planning, not professional advice.

MONTHLY LIVING COSTS

Estimate a normal month in your destination. Include expenses that are easy to overlook.

MONTHLY EXPENSE WORKSHEET

EXPENSE ITEM	MONTHLY USD	NOTES
Rent or mortgage		
Utilities		
Internet and mobile		
Groceries		
Dining and entertainment		
Public transit / fuel		
Vehicle costs		
Health insurance		
Out-of-pocket medical		
Personal and household		
Childcare / education		
Other monthly costs		
TOTAL MONTHLY LIVING COSTS		

Tip: Multiply your monthly total by your desired reserve months to estimate an emergency reserve.

ONE-TIME RELOCATION COSTS

Capture the costs required before departure and during your first weeks abroad.

ONE-TIME EXPENSE WORKSHEET

EXPENSE ITEM	TOTAL USD	TIMING / NOTES
Visa and application fees		
Documents, apostilles and translations		
Flights		
Temporary lodging		
Shipping and extra baggage		
Storage		
Security deposit and housing setup		
Legal, tax and relocation advice		
Pet relocation / special needs		
Other one-time expenses		
TOTAL ONE-TIME MOVE COSTS		

FINAL FUNDING TARGET

One-time move costs

Emergency reserve

Contingency allowance

RECOMMENDED PRE-MOVE SAVINGS

USD TO LOCAL CURRENCY SCENARIOS

Stress-test your funding target against possible exchange-rate changes.

EXCHANGE-RATE SCENARIO PLANNER

Recommended savings in USD

Base exchange rate (local per USD)

Scenario	Rate adjustment	Local per USD	Savings in local currency
USD strengthens 10%	+10%		
USD strengthens 5%	+5%		
Base rate	0%		
USD weakens 5%	-5%		
USD weakens 10%	-10%		

HOW TO CALCULATE

Scenario rate = Base exchange rate x (1 + rate adjustment)

Savings in local currency = Recommended savings in USD x Scenario rate

Important

Exchange rates can change quickly, and transfer providers may add spreads and fees.

Confirm live rates and total transfer costs before converting or sending funds.

The accompanying Excel workbook performs these calculations automatically.
