

Query Parameter Fix Summary

Changes Made

Reverted query parameter names to match the original working format.

Files Modified: 2

1. EmailCaptureModal.tsx (Line 60)

OLD CODE:

```
window.location.href = `https://emi-pro-report-584996805327.us-west1.run.app/?pre-filled_email=${encodeURIComponent(email.toLowerCase())}&client_reference_id=${data.session_code} || ''`;
```

NEW CODE:

```
window.location.href = `https://emi-pro-report-584996805327.us-west1.run.app/?email=${encodeURIComponent(email.toLowerCase())}&session_code=${data.session_code} || ''`;
```

Changes:

- `prefilled_email` → `email`
 - `client_reference_id` → `session_code`
-

2. src/worker/index.ts (Line 1282)

OLD CODE:

```
const reportAppUrl = `https://emi-pro-report-584996805327.us-west1.run.app/?pre-filled_email=${encodeURIComponent(normalizedEmail)}&client_reference_id=${sessionCode}`;
```

NEW CODE:

```
const reportAppUrl = `https://emi-pro-report-584996805327.us-west1.run.app/?email=${encodeURIComponent(normalizedEmail)}&session_code=${sessionCode}`;
```

Changes:

- `prefilled_email` → `email`
 - `client_reference_id` → `session_code`
-

Expected URL Format

The new backend will now receive parameters in the original working format:

```
https://emi-pro-report-584996805327.us-west1.run.app/?email=user@example.com&session_code=ABC1-DEF2-GHI3
```

Status

- ✓ All occurrences updated
- ✓ URL encoding preserved (encodeURIComponent)
- ✓ Parameters now match original working format
- ✓ Ready for commit and push
