 - `netlify.toml` - Proper build settings
 - `public/_redirects` - SPA routing configured

2. Backend URL Update

- **Status:** CONFIRMED ✓
- **Commit:** bc8ec7a
- **New URL:** `https://emi-pro-report-584996805327.us-west1.run.app/`
- **Files Updated:**
 - `src/react-app/components/EmailCaptureModal.tsx` ✓
 - `src/worker/index.ts` ✓

3. Query Parameter Name Fixes

- **Status:** CONFIRMED ✓
- **Commit:** 6e37c00
- **Correct Parameters:** `email` and `session_code`
- **Files Fixed:**
 - `src/react-app/components/EmailCaptureModal.tsx` ✓
 - `src/worker/index.ts` ✓

GitHub Status

Repository: Gthorpe2274/Emigration-Pro-front-end-11-22

Branch: `eject-experiment`

Remote Sync Status:  FULLY PUSHED

Commits Ahead of Remote: 0 (fully synced)

The branch is properly tracked and pushed to:

`origin/eject-experiment`

Netlify Deployment Configuration

Build Settings

- **Build Command:** `npm run build`
- **Publish Directory:** `dist`
- **Node Version:** 22

Routing Configuration

- **API Proxy:** `/api/*` → Cloudflare Workers backend
- **SPA Fallback:** `/*` → `/index.html` (React Router)
- **Base Path:** `/` (root deployment)

Files Configured

-  `netlify.toml` - Build and redirect rules
-  `public/_redirects` - Netlify routing
-  `vite.config.ts` - Build optimization

Netlify Deployment Instructions

YOU ARE READY TO DEPLOY!

1. **Log into Netlify:** <https://app.netlify.com/>
2. **Deploy from GitHub:**
 - Select repository: `Gthorpe2274/Emigration-Pro-front-end-11-22`
 - **IMPORTANT:** Select branch: `eject-experiment`
 - Netlify will auto-detect settings from `netlify.toml`
3. **Verify Settings:**
 - Build command: `npm run build` ✓
 - Publish directory: `dist` ✓
 - Node version: 22 ✓
4. **Deploy!**
 - Click "Deploy site"
 - Netlify will build and deploy automatically

Summary

What's Confirmed:

1. **All changes are committed** to the `eject-experiment` branch
2. **All commits are pushed** to GitHub (0 commits ahead)
3. **Working tree is clean** (no uncommitted changes)
4. **All three fixes are included:**
 -  Blank screen fix (Vite optimization)
 -  Backend URL update (Google Cloud endpoint)
 -  Query parameter fixes (email, session_code)
5. **Netlify configuration is proper** (toml, redirects, vite config)
6. **Branch is ready for deployment** from GitHub

DEPLOYMENT STATUS: READY TO GO!

Your `eject-experiment` branch contains all fixes and is fully prepared for Netlify deployment.

Quick Verification Commands

If you want to verify locally:

```
cd /home/ubuntu/emigration_pro_frontend
git status           # Should show "nothing to commit, working tree clean"
git log --oneline -5 # Shows recent commits
git branch -vv       # Shows remote tracking status
npm run build        # Test build locally (optional)
```
